## HISTORY

### Health System Background –Afghanistan

Outline of the evolution of the Health Care System Before the communist regime in Afghanistan the health system was both curative and preventive oriented but during communist regime it was focused more on curative services. Eventually during Taliban regime the health system collapsed and all infrastructures annihilated. Brain drain of professionals was one of the main problems. The health system was in the emergency phase on that time. After the collapse of the Taliban regime the health system passed the emergency and conflict period and now is in the post conflict and developmental phase. For the first three years of the transitional Islamic republic of Afghanistan, the health system was

more preventive focused and more emphasis was placed on delivery of basic package of health services. Fortunately after the setting up of the Islamic Republic of Afghanistan, MOPH has put more attention to the implementation of both Basic package of health services and essential package of Hospital services. It means the government again insists on both curative and preventive aspects of health care and after our analytical researchs; we found hearing complications were common issue among thousands Afghans with non-basic consulting center to address them treatment facilities . at the same time we had established hearing center to address all local patience for their all check up here in local region Kabul city ..

## Hearing System

Our commitment and hardworking output were concluded to establish a wide equipped center in Kabul , being helps thousands of Afghans from all regions we called a high Gift of Hearing to thousands of Afghans,” said Dr. Sarwary, the Founder of The Haseeb Hearing Clinics he added . “By working together, all those we have cared for, especially children, can now lead better and more promising lives,” “Our current high international standard equipment with technological facilities in Hearing Care Mission was a beautiful example of Afghans for helping Afghans, working together will be the change we want to see in Afghanistan and in the world.”

“Each year, our work with patients treatment brings the Gift of Hearing to larger numbers of Afghans, and our collective commitment to being a compassionate force for good grows even stronger,“. “We are proud to partner with world well-known companies across the globe and importing value certified brand hearing aid equipment here to our beloved homeland Afghanistan and we will continue our work together, to bring the Gift of Hearing to Afghans in coming years too . and wish to help our all Afghans with such complication within near future .

## Clinic Background

The only vision for the launch of Haseeb hearing Clinics was to introduce a systematic way to find a professional Hearing clinic developed for patients and professionals.

As the health system were collapse with all soviet union and civil war entire the community of Afghanistan we had large amount of people who visited Hearing centers in cross the border countries like Pakistan , India , and Iran and many other countries. With due lack of professionals, experts in revealed career and threatened with huge of financial cost too . But after launch of the center we had introduced prosperous many health doctors in such field to receiving professional training packages in ( Hearing ) and do purse their Afghans own homeland applicant and communities members . with all mentioned accurate and value features we had more than 50000 – patients who has visited our health center to receiving health solution packages and 80% of visitor applicants have express deep agreement over the performances providing by our health dedicated facilities team .unfortunately we don't have any proper academic centers or university who provide Hearing training as major faculty or department entire their universities, or institutions curriculum structure. As well us we have more disqualified centers and applicants who emerging services in hearing with non-applicable license in authorizes to MOPH. Said Mr. Haseebullah Sarwary founder of HHC.

Mr. Sarwary added the stressed that for many patients; proactively seeking treatment can result in earlier diagnosis and preferred outcomes. Many hearing loss patients wait seven years before treatment, but the clinic hopes to reduce this number through educational outreach initiatives due to many Afghans still looking to receive treatment packages cross the border don't know we have required with world known diagnoses machines and equipments to treat them within finger counting minutes entire the country in cost effective financial status.

“People have a pre-conceived notion that if they come to us with hearing loss, they'll have to wear this humongous hearing aid, but they don't understand that the technology we have now makes it so that hearing aids today are virtually invisible,” Sarwary said as he held up a hearing aid measuring no more than minutes working . “We get patients that know they have hearing issues, so when they finally come to the clinic the most common complaint we get are that they have a hard time hearing in a group conversation. Hearing issues aren't only affects the individual but also the people around them.

## Founder Message

### Dear Readers

The concept to establish , invest or launch hearing diagnoses clinic were just not hope to serving our Afghans nation but encounter high sensitive issue for Afghans due to consecutive civil war , heritage has made out more people to post traumatic veteran issue that including deaf , blind , disable or outreach them with hearing complication while faces bomb blast or other . so as per my observation there were no entity and body who care for the such serious issue or make them as high university in academic division . quite start of 2007 while I had finalized my higher degree . and seeking to have a center for treat our Afghans with international standard but here in local region .

It is needless to say that understanding the real meaning of quality is very important in health care issues because everyone talks about quality, but in practice, this word is very elastic and hard to achieve. Quality is not something that we use to gain good reputation and fame only , but it's rather a combination of principles, values and continuous efforts to achieve and maintain excellence and distinction in everything we do making it at the end a way and a style of life.

We also believe very firmly that in order for us to grow and continue growing, we need to be very close, interactive and transparent with our valued clients due to our Afghan homeland members are too much in hard economic situation unable to pitch pay high amount for better treating their hearing complication . Growing can be achieved only when our patients are satisfied, loyal and pleased with our services. On the other hand, it is very important for us to understand the exact needs and requirements of our patients to be able to continuously introduce innovative and robust solutions promptly and efficiently.

Finally, I would like to admit that although there are many challenges ahead of us, we do have the guts and courage to face it as one professional team leading the way for others to follow. Our strength shall always be in diversifying our development in further measure to suit the market and implement effective strategies to realize and achieve our goals and would hope to widen the lap of such services to each region of our beloved country and I have gratuitously hope from the Afghanistan state to facilitate such services in refer to warm cooperation of our health care community .

**Dr . Haseebullah "Sarwary"**

Founder-HHC

**Dr . Laila “Sarwary”**  
CEO – HHC

## Dear Readers

Mrs. Dr. Laila Sarwary is the Chief Executive Officer, CEO of Haseeb Hearing Clinics, Kabul Main Hub. She has achieved MBBS Kabul Medical University degree since 2007 with specialized graduated from Istiqlal state owned Hospital Kabul .And has helped clinic concern issues from since six years consecutive back and retain large amount of achievement over her past performances and HHC leadership has always pay high range of respects for her high dedication, commitment and hardworking during last few years.

## Vision

To address Hearing complication across the Afghan communities, and build qualified and expert team who pinpoint hearing complication among Afghans bodies being resolve them from the spot .

## Mission

To enhance standard mechanism for providing high tolerated treatment for our beloved homeland members making high range of services to prevent Afghans for visiting other countries for hearing purposes treatment as well facilitate all recommending services on affordable cost .

## OUR GOAL

- ⊕ To inaugurate career development and replacement especially for those who anticipated proper training in mentioned above field.
- ⊕ To resolve our beloved homeland adherents hearing complication.
- ⊕ To launch high range of professionals via proper training both inside or abroad of country, which promote job boosting for growing more professionals and experiences in relevant field.
- ⊕ To facilitate world standardizes services could treat our Afghans with cost
- ⊕ To give bold feeling for Afghans having known intelligent self-sufficient required doctors to non - enter other country for the better treatment disputes.
- ⊕ To demonstrate and Comprises for bargaining high changes in their large costs of treatment .

## Strategically Goal

- ⊕ Invest in better staff training, which can then increase the efficiency of virtually any process by helping staff understand and consistently execute standard performances in their audiology strategies . Further benefits could come from employees understanding what their role is and how they can impact outcomes, thereby becoming "smarter" and capable of making better decisions faster and can grow most professionals too .
- ⊕ To be launch new upcoming branches over the country regions to provide high facilities to our poorest people who can't emerge to pay high cost for coming to Kabul central capital of Afghanistan
- ⊕ Further we are eager to enhance wide range of services across the country but due to security threat and concerns lead us to limiting our services within Kabul city ., and we do strongly recommend Afghan state and relevant institution being consider investors complication and make strong support environment among each other .

## Our Value Community

It is our immense pleasure being provide services to our Afghan bodies for any ages , religion , and nations and emerge high honored for the serving nations during last few years , as took partial complication organizer for hearing issue across the countries and observed well known position entire the community :

## Foreign Visit -Accreditation and Affiliation

HHC staff is hereby express high honor being visited several medical equipment centers for supplying world latest version of hearing devices machines as well accredited with world first rank companies manufactures and distributors , as our team has approached several abroad tour for visiting such companies in their owned home country such us china , turkey and Germany .

## Our Accreditation

In regard to serving nation with honor sentiment , herein Doctor Haseebullah Sarwary President of Kabulyan Trading Company and Haseeb Hearing Clinics , playing key role in importing hearing accessories with all legal mandatories in accreditation with international Hearing Medical Equipments suppliers as well achieved Afghanistan International Chamber of Commerce (ACCI) membership in awarded of gold rank among all hearing centers entire to Afghanistan state . As we commence all hearing performance in playing with our owned competent and non-emerge liable institution or government parties has helped us up to date.

HCC hereby honored to announce outstanding features for being import all hearing accessories from well- known entities across the globe in affiliated to sub-contractor companies located in India, China Dubai, Turkey and many others in reference to details SIEMENS , SIGNIA , PHONAK , AST , AUDIO SERVICE , A&M HEARING , STARKEY , REXTON , INTERTON , BELTONE , AUDIBEL , OTICON , RESOUND, UNITRON , BERNAFON , NEWSOUND & ETC . With paying large of amount of taxes and exactingly care for all legal liability as per Afghanistan effective law. We were totally vision to promote our clinics chain management in launching new regional offices across the country, but due to poor security scarcity were unable to achieve our goal with all accuracy parts. As well we had provided a high value of hearing accessories more than thousands of devices during past (11) years to our regional agents and hearing clinics centers allover of Afghanistan.

**Najeebullah  
"Sarwary"**

General Manager HHC

### Dear beloved Countrymen:

As young countryman I have been observed several our Afghan nation member who seriously suffer hearing complication with non- existence of proper diagnostic and professional center for the better invest on their valued treatment. Herein I had visited India state motivated me to have some research tour from health centers. I had found best place that served hearing disease with international modern technology and were admired to study such program being help my countrymen across the country. so with all such wonderful achievement I had return back and started to establish health center for promoting such facility since 2007 . And our output was altered to provide best result from past 11 years up to date due to treated several Afghans with local cost effective and modern technology practice.

## Product & Services

For the healthcare providers, we provide top of the art medical equipment's for all specialties as well as different types of instruments, consumables and furniture. We also provide very unique services for medical laboratories including Clean room assessment/ validation and Design/ creation of isolation rooms. It's worth mentioning here that our experience in hearing is very distinguished due to the fact that we own and operate a very specialized hearing laboratory considered to be the only hearing laboratory in the region that import material of hearing and making them with transparent hearing aligners using a patented technology owned by one of the partners. For the business community, we provide all types of services and products related to information/ communications technology.

### Our features and Products

We offer a wide range of solutions and it is important to remember that there is no such thing as "one size fits all." Just as each person's hearing loss is different, so are each individual's listening needs and preferences. What works for your neighbor, friend or family member may not be appropriate for you.

#### 1. Pure tone audiogram

Pure-tone audiometry is a behavioral test used to measure hearing sensitivity. This measure involves the peripheral and central auditory systems. Pure-tone thresholds (PTTs) indicate the softest sound audible to an individual at least 50% of the time. Hearing sensitivity is plotted on an audiogram, which is a graph displaying intensity as a function of frequency.

#### 2. Evoked response audiogram

You lie on a reclining chair or bed and remain still. Electrodes are placed on your scalp and on each earlobe. A brief click or tone will be transmitted through earphones you are wearing during the test. The electrodes pick up the brain's responses to these sounds and record them. You do not need to be awake for this test.

#### 3. Tympanogram

Tympanometry is a test of middle ear functioning. It looks at the flexibility (compliance) of the eardrum to changing air pressures, indicating how effectively sound is transmitted into the middle ear. This objective test also allows us to view the functioning of the Eustachian Tube, the upper auditory pathways and the reflex contraction from the middle ear muscles. Impedance testing is crucial in distinguishing a conductive loss from a sensor neural hearing loss. A typical tympanometry result indicates the ear canal volume (cm<sup>3</sup>), the max pressure (da Pa) and the peak compliance (ml)

#### 4: Diagnosis of hearing types

As you seek to understand what a hearing loss may mean to you or a loved one, we strongly encourage you to reach out to a **hearing healthcare provider** for a comprehensive hearing evaluation and information specific to your situation. Going to a hearing care professional helps ensure that you receive a proper diagnosis of the cause, type, and severity of hearing loss you may have. Importantly, a hearing care professional can make appropriate recommendations for addressing your individual hearing needs.

## 5: Diagnosis of ear diseases

Your doctor may perform other diagnostic tests if there is any doubt about a diagnosis, if the condition hasn't responded to previous treatments, or if there are other persistent or serious problems.

### Tympanometry

This test measures the movement of the eardrum. The device, which seals off the ear canal, adjusts air pressure in the canal, thereby causing the eardrum to move. The device quantifies how well the eardrum moves and provides an indirect measure of pressure within the middle ear.

### Tympanocentesis

Rarely, a doctor may use a tiny tube that pierces the eardrum to drain fluid from the middle ear — a procedure called tympanocentesis. Tests to determine the infectious agent in the fluid may be beneficial if an infection hasn't responded well to previous treatments.

### Acoustic reflectometry

This test measures how much sound emitted from a device is reflected back from the eardrum — an indirect measure of fluids in the middle ear. Normally, the eardrum absorbs most of the sound. However, the more pressure there is from fluid in the middle ear, the more sound the eardrum will reflect.

### Other tests

If your child has had persistent ear infections or persistent fluid buildup in the middle ear, your doctor may refer you to a hearing specialist (audiologist), speech therapist or developmental therapist for tests of hearing, speech skills, language comprehension or developmental abilities.

## 6: Advices of hearing aids

Not everyone with hearing loss can benefit from hearing aids. But only 1 in 5 people who could have improvement wear them. Most of the time, they're for people who have damage to their inner ear or the nerve that links the ear with the brain. The damage can come from:

- + Disease
- + Aging
- + Loud noises
- + Medications

## 7. Hearing aids for tinnitus masking

Tinnitus is the perception of noise or ringing in the ears often relates to hearing loss, Tinnitus is overwhelmingly connected to some level of hearing loss. Augmenting the reception and perception of external noise can often provide relief from the internal sound of tinnitus.

Tinnitus masking hearing aids can reduce the amount of ringing in the ears at some level.

## 8. Hearing aid repairing, programming and fitting

The process of purchasing and adjusting to hearing aids doesn't have to be challenging, and at Applied Hearing Solutions we follow industry best practices with extreme precision to ensure that you are set up for success. The importance of a properly fitted and programmed hearing aid cannot be emphasized enough, and our team will go above and beyond to make sure you get years of the highest quality and most consistent hearing possible from your hearing devices.

We are proud of the technology in which our branded Hearing aids can cover over 120 dB of hearing loss.

## 9. Speech therapy

Some kids have trouble saying certain sounds or words. This can be frustrating because others may have trouble understanding what they're trying to say. articulation (say: ar-tik-yuh-LAY-shun) disorders: This when a kid has trouble saying certain sounds or saying words correctly. "Run" might come out as "won." Or "say" may sound like "thay." Lisps are considered articulation disorders

## 10. Hearing aid batteries

We offer excellent hearing aid battery prices and the widest selection of the top hearing aid batteries and cochlear battery brands on the Internet: Duracell, Energizer, iCellTech, NEXcell, Panasonic, Power One, Rayovac, Renata, SONY, Toshiba, ZeniPower, plus ACCU plus rechargeable hearing aid batteries. Other sites may try to persuade you they are better. You be the judge! Microbattery.com guarantees your complete satisfaction or your money back. We offer same day shipping, fresh stock, all models, and the lowest prices. Guaranteed.

## 11. Ear moulds

Should a hearing test show that you suffer from hearing loss, then the next step is to obtain a hearing aid ear mold.

To get an individually fitted hearing aid, it is necessary to make a casting of the ear canal to ensure that the hearing aid ear moulds fits perfectly and the ear mould is obtained by ear impression.

## 12. Video Otoscopy

The sense of hearing is an incredible process. Discover how our ears and our brain work together, so that we can hear the world around us. This test lets audiologist to take a deep look to ear tympanic membrane and also capture a photo or vico from it, if it is required by ENT professor or specialist. HCC honored being import Hearing Signal from the world well-known companies and firms which are follow :

## Scientist Medical Analysis

In regards to our recent research, conducted by our health members since 2007 till June 2017. We had observed much complication with our Afghans in hearing issues with some major are as below. Further has provided remarkable treatment for more than 50.000 patience across the country .Said the General Manager for HHC.

1. Noise induced hearing loss (NIHL)
2. Age related hearing loss (presbycusis )
3. Hearing loss due to trauma & blasts.
4. Hearing loss with tinnitus due to depression & stress.
5. Hearing loss due to blood lipids/diseases.
6. Hearing loss due to otosclerosis.
7. Hearing loss due to ototoxic drugs or narcotics.
8. Hearing loss due to presence of ear foreign body, tympanic membrane perforation, Common cold, Eustachian tube blockage, Tympanosclerosis, Genetical, etc..

## Patients feedback

## Training Sessions

Professionals and the general medical employee in the hospitals.

Our training programs can be delivered at our specialist regional training center in Kabul city of Afghanistan .Our training centers have an extensive network of affiliations with Internationally-recognized medical and academic centers of excellence. Additionally we are able to offer a variety of accredited courses by Independent (free lancers). And our dedicated team member has visited several countries for receiving professional training in Hearing , as took warm places at China , Malysia, Singapore, Indonisia, Pakistan, India, Turkey and Europe countries and unleashed an outstanding experience too .

## Attending summit and Conference

Dr. Haseebullah "Sarwary" founder of HCC has visited and attended several local , area and international conferences and summit for exchanging working value and experiences in better implementing of health care issues faces to our Afghans with that and bringing of new idea are using in abroad for the hearing purposes and we extend our big pleasure being promote such program with affiliation of foreign well-known companies .
